

PEPPER (HOT) | BANANA

WS-4728

Technical Description

Strong plants that are loaded with beautiful, uniform fruits. This variety is known for high production potential and highly marketable banana peppers. Plants have good cover for fruit due to great foliage, and have an open habit which makes for an easy harvest. Color is a vibrant and typical shade of yellow most associated with banana peppers. Variety is very early and high quality.

Vegetable
Pepper (Hot)

Type
Banana

Days to Maturity
Early Season

Growing Conditions
Open Field

Color
Creamy Gold

Disease Resistance
BLS

Westar®
WESTAR SEEDS INTERNATIONAL, INC.
